

HOT CUPBOARD & BAIN MARIE HOT CUPBOARD

GENERAL SAFETY

For information and advice on the suitability and safety of this type of equipment please contact Jaspers Hire.

This equipment should only be used by a competent and responsible adult who has read and understood these instructions.

Keep all children, animals and bystanders away from the work area.

Ensure that the equipment is sitting level and the floor of the work area is free from trip hazards and nonslip.

Never use the equipment if you are ill, tired or under the influence of alcohol or drugs.

Never operate electrical switches with wet hands. Always switch off and unplug the equipment from the power supply before moving or cleaning.

Check the equipment before use and report any damage to Jaspers Hire.

REMOVE ALL PACKAGING BEFORE USE.

There is a risk of injury if you do not follow the instructions printed in this guide.

ELECTRICAL SAFETY

The equipment is designed to plug directly into a standard 240volt, 13amp socket. Make sure the equipment and power socket are switched off before plugging into the power supply.

If the equipment fails to operate or the power cable or plug becomes damaged, contact Jaspers Hire. Do not try to repair it yourself.

Keep the power cable out of harm's way. Extension leads should be fully unwound, never run them through water, over sharp objects or where they may be a trip hazard.

Use a suitable RCD (Residual Current Operated Device) to reduce the risk of electric shock.

IMPORTANT: THIS EQUIPMENT REQUIRES A CONTINUOUS SUPPLY OF 13AMPS TO OPERATE CORRECTLY.

IF THIS EQUIPMENT IS NOT REACHING TEMPERATURE YOU MAY NOT HAVE ENOUGH AMPS.

BAIN MARIE OPERATING GUIDE

The temperature of the Bain Marie section is adjusted by a control knob located on the control panel.

DRY HEAT WELL

WARNING: It is essential that models which are dry heat only are not filled with water. Heating is by hot air.

The element which heats the air is adjusted by a control knob, located on the control panel, which may be varied to meet the individual requirements.

(a) Pre-heat the well on full for approximately 15 minutes before use. Place empty containers with lids in each of the apertures to prevent heat loss.

(b) Many factors will determine the best control knob position, such as the amount and temperature of the food loaded.

Experience from using the Bain Marie will soon show the best setting for any given occasion.

Please remember a Bain Marie is not designed to heat up or cook food, but is designed to maintain it at a satisfactory temperature before serving.

HOT CUPBOARD OPERATING GUIDE

(also applicable to Hot cupboard section of Bain Marie units) This section is thermostatically controlled and operated by a control knob, located on the control panel.

To obtain the best performance, the following procedure is suggested:

(a) Pre-heat the Hot cupboard empty for 30 minutes, with the control knob turned on full.

(b) Load the Hot cupboard as required. Many factors will determine the best control knob position, such as the amount and temperature of the food loaded, and the frequency of the opening and shutting of the doors.

Experience from using the hot cupboard will soon show the best setting for any given occasion.

(c) Set the thermostat at the required temperature, no further adjustment is necessary.

Stacked plates take a long time to heat through completely.

Please remember a Hot Cupboard is not designed to heat up or cook food, but is designed to maintain it at a satisfactory temperature before serving.

REMOVING AND REPLACING TOP HUNG DOORS

(a) Remove the door bar from the bottom of the doors, by lifting one end up and removing.

(b) Grip the sides of the outer door and hinge out (1) until the door can be lifted off the track (2) and removed from the cupboard (3), repeat with the second door.

(c) Reverse the process to reattach the doors ensuring that the correct door is refitted first, ensure the doors are fitted correctly by sliding them left to right.

See the simplified cutaway drawing of Hot Cupboard above.
